

Instructional Segment	Turtle Talks	Rivers to Oceans
<p><i>Grade K-2</i>  <b>Program Synopsis</b></p>	<p>Turtles live on both land and water. Some spend their entire lives in the water, like sea turtles, and others spend their entire time on land, like the Galapagos tortoise. Each one has unique characteristics and diets. Students will describe these differences by observing real shells and skulls.</p>	<p>The majority of the Earth is made up of water with a very small portion being freshwater. But what is the difference between freshwater and saltwater? It runs deeper than you think! This program will compare and contrast some attributes of fresh and salt water in addition to animals that live in one habitat or the other.</p>
<p><b>Key Terminology</b></p>	<ul style="list-style-type: none"> <li>• Sea turtle</li> <li>• Tortoise</li> <li>• Carapace</li> <li>• Diet</li> <li>• Physical Characteristics</li> <li>• Light Pollution</li> </ul>	<ul style="list-style-type: none"> <li>• Attribute</li> <li>• Saltwater</li> <li>• Freshwater</li> <li>• Float</li> <li>• Diet</li> <li>• Habitat</li> <li>• Life-cycle</li> </ul>
